25 Dear Editor,

26 We thank Nguyen et al.<sup>1</sup> for their interest in our recent publication in Osteoarthritis and Cartilage  
27 entitled “Total knee replacement and non-surgical treatment of knee osteoarthritis: 2-year outcome  
28 from two parallel randomized controlled trials”<sup>2</sup>.

29 We do agree with the authors that clarity and transparency are crucial when reporting research  
30 findings. We believe our report from the two, parallel randomized controlled trials is adequate in  
31 terms of the comments given and aligns with best practice.

32 First, in the title, abstract, main text and in the figure legends, we clearly state that we are reporting  
33 the results from two parallel randomized controlled trials. Furthermore, both trial registration  
34 numbers are stated at the end of the abstract as required by Osteoarthritis and Cartilage and  
35 suggested by CONSORT. In the introduction and methods, we provide a thorough and transparent  
36 description of similarities and differences between the two trials. Based on our reporting, we find it  
37 difficult to believe that a reader would misinterpret this as a single four-arm trial. Second, to  
38 highlight that this is an extended follow-up of the two trials we refer to the primary reports<sup>3,4</sup> in the  
39 introduction and the methods. As written by Nguyen et al,<sup>1</sup> we clearly defined the primary outcome  
40 in this extended report as the between-group difference in change in Knee Injury and Osteoarthritis  
41 Outcome Score subscales, covering pain, symptoms, activities of daily living, and quality of life  
42 (KOOS<sub>4</sub>) at 24 months while the primary endpoint of the two trials was the mean between-group  
43 difference in change in the KOOS<sub>4</sub> at 12 months.

44

45

46

## 47 **ACKNOWLEDGEMENTS**

48 None for this letter.

## 49 **AUTHOR CONTRIBUTIONS**

50 **Study conception and design.** Skou, Roos, Laursen, Rathleff, Arendt-Nielsen, Rasmussen,  
51 Simonsen

52 **Drafting the letter or revising it critically for important intellectual content.** Skou, Roos,  
53 Laursen, Rathleff, Arendt-Nielsen, Rasmussen, Simonsen

54 **Final approval of the letter.** Skou, Roos, Laursen, Rathleff, Arendt-Nielsen, Rasmussen,  
55 Simonsen

56 All authors take responsibility for the integrity and accuracy of the content.

57

## 58 **FUNDING/SUPPORT**

59 The trials referred to in this letter were partially funded by The Danish Rheumatism Association,  
60 The Health Science Foundation of North Denmark Region, Obel Family Foundation, Foot Science  
61 International, Spar Nord Foundation, The Bevica Foundation, The Association of Danish  
62 Physiotherapists Research Fund, Medical Specialist Heinrich Kopp's Grant, and The Danish  
63 Medical Association Research Fund.  
64 Søren Thorgaard Skou is currently supported by the Danish Council for Independent Research  
65 (DFR – 6110-00045) and the Lundbeck Foundation.

## 66 **ROLE OF THE FUNDER/SPONSOR**

67 The funders played no role in drafting this letter.

## 68 **CONFLICT OF INTEREST**

69 Dr. Roos is deputy editor of Osteoarthritis and Cartilage, the developer of Knee injury and  
70 Osteoarthritis Outcome Score (KOOS) and several other freely available patient-reported outcome

measures and co-founder of Good Life with Osteoarthritis in Denmark (GLA:D), a not-for profit initiative hosted at University of Southern Denmark aimed at implementing clinical guidelines for osteoarthritis in clinical practice.

Dr. Skou is associate editor of Journal of Orthopaedic & Sports Physical Therapy, have received grants from The Lundbeck Foundation, personal fees from Munksgaard, all outside the submitted work. He is co-founder of GLA:D. GLA:D is a not-for profit initiative hosted at University of Southern Denmark aimed at implementing clinical guidelines for osteoarthritis in clinical practice. The authors report no other conflict of interest.
